Received numerous awards for outstanding performance and contributions all through the career.

Work Experience:

Sails Software Solutions

Infinite Computer Solutions
IBM India Pvt Ltd
PhyCARE Services
MEK Solutions

DevOps/Site Reliability Engineer (Oct 2022 – Present)

Senior Technical Lead (Oct 2021 – Oct 2022)
Technical Lead (May 2010 – Oct 2021)
Software Engineer (Aug 2006 – May 2010)
Software Engineer (Feb 2005 – July 2006)

Projects –

Unemployment Claims – NASWA (Sides Hub)

DevOps Lead & Site Reliability Engineer

- Sides Hub is a type of data exchange for certain types of unemployment claim documents and a third-party central broker.
- Sides Hub will facilitate the bi-directional transactions between the central broker and the consuming platforms. Onboarding new document types will make the first large TPA to offer this service.
- Dataflow jobs pull STS files from the broker for all TPAs and store that data in GCP. Consumer platform batch processes incrementally poll the hub for documents for the platform TPAs. There is a shared UI where the user can respond to the document, and then dataflow jobs will post these responses to the central broker.

Major Modules –

- SIDES Common Hub, Edge System, Pinnacle System, API Layer, Common UI

HR Domain (Talent Management Suite – BrassRing)

Senior Technical Lead

BrassRing Platform is a highly scalable and configurable integrated suite of recruitment solutions augmented by proven consumer marketing tools and practices to help build proactive pools of best-fit talent, market to and nurture candidates, deliver an exceptional candidate experience on any device, and increase productivity in new hires.

Health Care Domain

Software Developer

5+ years of experience as a Software Developer.

- Involved in Architecture and database Design
- Involved in creating design and implementation documents
- Involved in client side and server side coding, unit testing and delivery process
- Developed and supported below health care related products which are primarily to Recruit Attendings, Residents and Nurses, Recover Provider's payments
- Developed in conjunction with medical doctors, health care staff and patients, Internal product for tracking Tickets, Leaves, Discussion Forum and Online marketing and educational services.

Products

- Provider Billing System
- Evaluation Management System
- Enterprise Health Care System
- I-Xchange
- Jobs Orbit
- Medsite Invites

Expert Skills

- Team Management
- Delivery Management
- GCP, Azure, AWS
- Jenkins, Ansible
- Cloud Logging & Monitoring
- Cloudability Billing Dashboard
- Datadog Infra monitoring and Synthetic Tests
- C#, ASP.NET, MVC, Rest API
- DotNet Core, Microservices
- Dockers & Kubernetes
- SQL
- Styling, Scripting & Markup Languages
- Scrum Master

Technical Components

- Google Data Flow
- Cloud Scheduler
- Barricade Encryption
- GCP Storage
- Google Pub Sub
- Spanner DB
- Terraform
- Jenkins
- GKE Kubernetes Cluster
- Datadog Infra Monitoring
- Datadog Synthetic Tests
- Pager Notifications
- GChat CICD integration
- Nexus and Google Container Registry
- Cloudability Billing Dashboard
- Big Query & Log Sinks
- Looker Studio

Intermediate Skills

- Solr
- ELK Stack
- DotNet6
- Python
- UI Technologies
- Hive

Education

Graduation – 80.6%

(B.Tech. IT, Andhra University)

Intermediate – 87%

SSC – 78.6%

Patent

System & Method to measure adverse propensity of employee's attrition on an organization

Patent ID: **95789133**

Filed Date: 09 JAN 2020
